I had that conversation with Krueger. I had written a nasty email reminding them of the regulation. He said it was okay, but ultimately convinced me not to. I'm fine with it. If you have any reservation, I'd recommend discussing it with Krueger. It is within our authority to remind them of the regulation.

So do we need to remind them again that everything at end of pipe (EoP) is considered a release and that a "threat of release" is still a release as well? The pictures always are taken away from the EoP and not even close to representative of where a first release would be.
